

9. A method of installing a blanket of fibrous building insulation comprising:

- (a) making a blanket of fibrous building insulation in accordance with the steps of claim 8;
- (b) cutting the blanket along a line of perforations to correspond the width of the blanket to a predetermined spacing between structural members between which a blanket of insulation is to be installed; and
- (c) fastening a portion of the cut blanket of fibrous building insulation in the predetermined spacing between structural members.
